PROFILE

Junior Software Engineer specialized in full stack web development, with practical experience in web applications, microservices, REST APIs, API Gateway, application security and CI/CD. Main project completed at **BIAT-IT** around a banking platform based on **Spring Boot, Angular, WSO2 API Manager, Docker** and **Jenkins**. Currently interested in **SAP Commerce / Hybris 2205** and **Spartacus**. Autonomous, adaptable and fast-learning profile.

TECHNICAL SKILLS

Frontend: Angular, React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind

Backend: Spring Boot, Node.js, Express.js, REST APIs, Microservices

API & Architecture: API Gateway, Spring Cloud Gateway, WSO2 API Manager, Eureka, Config Server

Security: Spring Security, JWT, OAuth2, API Key, CORS

Databases: MySQL, MongoDB, SQL Server **Testing:** JUnit, Mockito

DevOps: Docker, Docker Compose, Jenkins, Git, GitLab, Nexus, SonarQube, CI/CD

Currently learning: SAP Commerce / Hybris 2205, Spartacus, Next.js

PROFESSIONAL EXPERIENCE

Final Year Project — Full Stack / Microservices — BIAT-IT, Tunis

Jan.–Jul. 2025

Banking web platform: account opening, credit requests, appointments, card requests and notifications.

- Designed a **microservices** architecture with **Spring Boot, Angular, Spring Cloud Gateway, Eureka** and **Config Server**.
- Integrated **WSO2 API Manager** for the management, security and exposure of **REST APIs**.
- Implemented security mechanisms with **Spring Security, JWT, OAuth2**, API Key and CORS configuration.
- Developed modules: OCR, electronic signature, document management, email notifications and validation workflows.
- Set up a **CI/CD** pipeline with **Jenkins, Docker, Docker Compose, SonarQube** and **Nexus**.
- Wrote unit and integration tests with **JUnit** and **Mockito**.

Full Stack Freelance Developer — Moutouri Project

Oct. 2025–Jan. 2026

Web marketplace dedicated to the sale of used motorcycles and motorcycle parts.

- Developed frontend interfaces with **React.js** and backend APIs with **Node.js / Express.js**.
- Designed a multi-role dashboard for managing shops, products, listings and publications.
- Structured a **MongoDB** database to centralize users, shops, products and listings.

Engineering Intern — SAGEMCOM, Ben Arous

Jul.–Sept. 2024

ETL automation, industrial data modeling and Power BI dashboards.

- Automated a Python ETL process for more than **5,000 rows** of industrial data.
- Modeled a **14-table** database using SQL Server Management Studio.
- Created **Power BI** dashboards to improve production data analysis.

Immersion Intern — StartNow, Ariana

Jun.–Jul. 2023

Frontend development for a report generation tool.

- Developed frontend interfaces with **React.js** and collaborated with the team through **GitLab**.

SELECTED PROJECTS

CI/CD DevOps Pipeline

Nov. 2024

- Deployed a CI/CD pipeline for a **Spring Boot + Angular** application with **Jenkins, Docker, Nexus, SonarQube** and automated tests.

VitaNova — Health & Sport

Jan. 2024

- Developed a health tracking web application with personalized recommendations. Stack: **Spring Boot, Angular, SQL**.

EDUCATION

ESPRIT — School of Engineering, Tunis

2022–2025

Software Engineering Degree

IPEIN, Nabeul

2020–2022

Preparatory Cycle for Engineering Studies

CERTIFICATIONS & LANGUAGES

Certifications: NVIDIA Deep Learning, IBM Front-End React, IBM AI Fundamentals, Kaggle ML/Pandas/Data Cleaning, Cisco Data Science.

Languages: Arabic C2, French B2, English B2.

Soft skills: autonomy, rigor, communication, teamwork, problem solving, fast learning.
